

WCAPP Four

Programs:

Water pledge – A commitment by residents to implement specific water conservation efforts.

Toilet leak detection and repair kits – support the identification and repair of toilet leaks.

Rain gauge and landscape watering – Explanation and promotion of appropriate and efficient landscape irrigation practices.

Rain barrel programs – Demonstration projects to promote the purchase, proper installation and efficient use of rain barrels for rainwater harvesting.

DuPage Teachers Attend a Water Journey Presentation and Tour at DuPage Water Commission

Date: June 20, 2018

On June 18, 2018 School & Community Assistance for Recycling & Composting Education ([SCARCE](#)) arranged for about 15 DuPage County teachers to attend a water journey presentation about DuPage Water Commission (DWC) and its Water Conservation and Protection Program (WCAPP).

Manager of Operations, Terry McGhee, presented the teachers with a background on how the Commission came into existence as well as how the Commission delivers water to their customers. He also discussed the Commission's Leadership in Energy and Environmental Design (LEED) certified building.

Water Conservation Coordinator, Jenessa Rodriguez, presented the four programs from the Water Conservation and Protection Program (WCAPP) to the teachers, which included: Water Pledge, Residential Leak Detection and Repair, Rain Gauge and Landscape Watering, and Rain Barrel Usage. Operations Supervisor, Mike Weed, then gave a tour of the DuPage Pumping Station so the teachers could get a better understanding of how a pumping station works.

The promotional materials that DWC hands out at events were given to the teachers to use in their classrooms to promote water conservation. These items included: shower timers, rain gauges, leak detection tablets, and educational handouts.

Terry McGhee presenting the Lake Michigan to DWC Water Journey

Mike Weed reviewing how the control room operator controls valves, pumps, and tanks from a central location

Mike describing the different types of pipe the Commission utilizes in the field

Mike pointing out the reservoir behind the pump station

Mike showing the original exterior of the generator building
